

The Operating System for Intelligent Capital.

Bloomberg Terminal × Renaissance Technologies × Stripe for Capital Allocation

THE PROBLEM

Institutional intelligence is fragmented & inaccessible.

Hedge funds pay \$500K+/yr for Bloomberg, quant models, and macro research.
Retail investors get watered-down apps.
RIAs stitch together 6+ platforms.
Nobody has the full picture.

THE SOLUTION

One unified intelligence layer for every capital allocator.

AI-powered portfolio construction, real-time macro intelligence, CMT-grade technical analysis, copy trading, political alpha, and execution — in one beautifully designed platform.

PRODUCT PILLARS

Intel.

Full CMT-grade TA: Stage 2.0, Wyckoff, Elliott Wave, Minervini, ICT, Volume Profile — compiled into one signal.

Macro.

Regime detection, liquidity heatmap, FOMC analysis, sector rotation, scenario planning, intermarket.

Trade.

Paper + live execution via Alpaca. Intel signal pre-fill.
Order management. Position tracking.

Copy.

Leaderboard ranked by Sharpe ratio. Verified strategy streams. Live trade mirroring. Bot subscription.

Alpha.

Congressional disclosures within hours of filing.
Reverse Cramer signals. Insider Form 4 tracking.

Marketplace.

Strategy Marketplace — quants, macro traders, and AI models publish signal streams. Users allocate capital.

Risk.

War Room mode: VaR tracking, tail risk, stress tests, black swan simulations. Institutional armor.

Plan.

Net worth unification, retirement modeling, goals, budget tracking — full financial planning suite.

REVENUE MODEL

Core	\$0/mo
Wealth	\$49/mo
Private	\$199/mo
RIA Seat	\$500–2K/mo
Managed AUM	0.75% AUM
Marketplace	20% take rate

MARKET OPPORTUNITY

Portfolio tracker, basic TA	\$100T+
Full Intel, options flow, TA analysis	\$26B
Advisor access, 1:1 research & analytics	\$4.8B
Multi-client dashboards, white-label	\$1.2B
Copy trading platform market	0.001%
Strategy signal streams	0.001%
